Please Don't Misunderstand

me. Anyone whose good standing is known to me may have my whole bloomin' stock on approval. But—the items offered in the COIN CIRCULAR are always especially priced, and often will muster in the "bargain" class. Therefore, preference is always given to those who enclose remittance with order rather than to those who are uncertain whether they want the coin or not. This particularly applies to items of which I have but a single specimen.

Also remember, that even though you send remittance with your order you take no more chance than if you hadn't. If the coin is sold, your money comes back by the first mail. If you get the coin and you don't like it, all that's necessary for you to do is to simply return it and say you want your money back. It will be returned to you immediately without argument or question.

ALSO, please don't hesitate to order just because you think the item you want may be sold before your order gets here. For all you know, I may have a barrel full of that very item. Also, why not send a supplement list or substitute list of the many fine things offered here. In doing so you will avoid being disappointed and incidentally saving your remittance an unnecessary return journey from here.

Can't resist the temptation of closing with my famous ditty—"Satisfaction Guaranteed or Money Refunded."

Cordially yours,

January 24, 1925.

Then from the other end of the country, from Connecticut, a friendly doctor writes in: "Just looking over your COIN CIRCULAR your 'Lest We Forget' made me feel very sad, and I tried to think up some way to relieve you from the terrific stringency that seems to grip your soul in its octopus-like malignancy. Rash as it may seem, I decided to dig out one of my valued duplicates as a token of sympathy."

Don't know what the doctor is driving at, but he sent in a cash order so I know it must be O. K.

Continuing our journey, we come to Santa Rosa, California, and find Mr. F. W. L., a banker, tells us: "I want to thank you for your CIRCULAR No. 8. I enjoyed the reading matter immensely and want to commend you highly for your attitude on commemorative issues of coins."

Then, going across the country we stop off at Bloomfield, Illinois, from whence this pleasant message is received: "Coins received today. Very much pleased. Many thanks." H. W.

"Is This Fortune Yours?"

Among the numismatic fables, periodically published in the press, the following always attracts much attention. Probably so because it is all fiction. However, it makes interesting reading and indirectly, attracts the attention of the public to numismatics:

> "Somewhere in the world there is a fortune unsuspected. Among the coins Napoleon had minted were some five-franc pieces, and he determined to popularize these in an extraordinary way. In one of the coins folded to a tiny size, is enclosed a note signed by Napoleon, and promising the sum of five million francs to the finder of that particular coin. Naturally everybody who change a large piece demanded the new five-franc coin in exchange, and, as a rule, probed and dug and sounded the metal in eager search for the hidden note. But the years went on and yet the note did not appear.
>
> "Napoleon's plighted word is a sacred trust to the French nation, and today the Government stands ready to pay the debt, which, with interest, is now worth about $6,000,000."

Now, here are some of these silver five-franc pieces of Napoleon. And, brother, I'll sell them for quite a bit less than $6,000,000 each!! The only thing they lack is the magic note of Napoleon! However, each coin has a fine portrait of the great Napoleon and all of them are dated and were issued during his life-time. Price?—just a couple of dollars each.

Early U. S. Silver Dollars Are Scarce, and Getting Scarcer

While in Cleveland, Ohio, last August, I ran into a "nest" of these dollars; a lot collected some thirty to forty years ago. There weren't so awfully many of them, but enough to justify my offering you a

Here Is Something Worth-While Waiting For

My catalog of the E. E. Wright Collection—now in preparation. It is truly a "Treasure House" of Numismatics. Coins, medals and paper money of every kind and description. One of the most "General Collections" I have ever before offered.

Of course these fine catalogs are free to those who are on my "Mehling List."

Bits of Coin News Gleaned from the Foreign Press

Austria has a new shilling of the nominal value of 10,000 kroner, and a silver value of 8,000 kroner or about 13c in real money.

Hungary has a new crown which the people seem to take to with avidity.

Russia had some forty million half-roubles minted in London. Designs, however, were made and furnished by the Liningrad Mint. In fact, it seems that all of the European countries whose chief medium of exchange, since the war, has been artistically printed paper, but otherwise almost worthless, are getting back on the more sound specie basis.

DO YOU KNOW

That of the only 46 dates of large U. S. Copper Cents issued from 1816 to 1857 there are more than 450 DIE VARIETIES?

ALL of these 450 varieties are fully described, listed and easily attributed in Andrews' book on these cents. This book, until just recently, sold up to **$30.00 per copy!** But **now** a generous hearted numismatist (modesty prevents my mentioning his name) reprinted this valuable book and made it possible for you to get it for just—

One Dollar!

NUMISMATIC SECRET REVEALED

How to Make a Ten-Cent Coin Be Worth a Dollar and More!

Take an ordinary large U. S. Copper Cent, any date from 1816 to 1857, then take Andrews' Book on U. S. Cents, and describe or attribute the said cent in accordance with the said book. Presto! The minute the cent is properly attributed it leaves the ranks of just ordinary cents and is transformed into a real identified coin—and worth several times its former value!

This formula was impossible until just now. The book was unobtainable. But now, you can get this book for just a dollar.

B. Max Mehl will see that you get the book if you'll send him the dollar.

JACKASS BILL

No, this is not the romantic name of a Texas cowboy. It's the title by which a certain U. S. $10 note is designated by. It is the old Ten-Dollar bill on which is a small eagle in lower center, and when the note is held upside down—presto! the eagle assumes the very marked likeness of a donkey!

I have two of these bills in stock. Both good. Of course they're worth $10 face at any time—at any place.

"Gentleman" and "Lady"

The terms "gentleman" and "lady" have been so overworked and have been misapplied so frequently that their real meaning has become obscured. Nuggets comes to the rescue and interprets the word "gentleman" as follows: A man who is clean both outside and inside, who neither looks up to the rich nor down to the poor; who can lose without squealing and win without boasting, who is considerate to women, children and old people, who is too brave to lie, too generous to cheat and who takes his share of the world and lets others have theirs.
